

## BEGINNER PROJECT 2

### To-Do List App (Frontend)

1. objective: Build a basic To-Do list web appli. Using HTML, CSS, and JavaScript.
2. skills: Learn how to organize your code into commits and set up a Github repo
3. Github concepts: Regularly commit your progress, create branches for features and make pull requests.

#### Step 1 - Building website -

- HTML

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta http-equiv="X-UA-Compatible" content="IE=edge">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">
7   <!-- Google Fonts -->
8   <link rel="preconnect" href="https://fonts.googleapis.com">
9   <link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>
10  <link href="https://fonts.googleapis.com/css2?family=Poppins&display=swap" rel="stylesheet">
11  <!-- Font Awesome cdn css -->
12  <link rel="stylesheet" href="https://cdnjs.cloudflare.com/ajax/libs/font-awesome/5.15.3/css/all.min.css" integrity="sha512-18064-18064-18064-18064-18064" crossorigin="anonymous">
13  <link rel="stylesheet" href="./styles.css">
14  <title>To Do List</title>
15 </head>
16 <body>
17
18   <header>
19     <h1>My To Do List</h1>
20   </header>
21
22   <form action="">
23     <input type="text" class="todo-input">
24     <button class="todo-button" type="submit">
25       <i class="fas fa-plus-circle fa-lg"></i>
26     </button>
27     <div class="select">
28       <select name="todos" class="filter-todo">
29         <option value="all">All</option>
30         <option value="completed">Completed</option>
31         <option value="incomplete">Incomplete</option>
32       </select>
33     </div>
34   </form>
35
36   <div class="todo-container">
37     <ul class="todo-list"></ul>
38   </div>
39
40   <script src="./script.js"></script>
41
42 </body>
43 </html>
```

- CSS

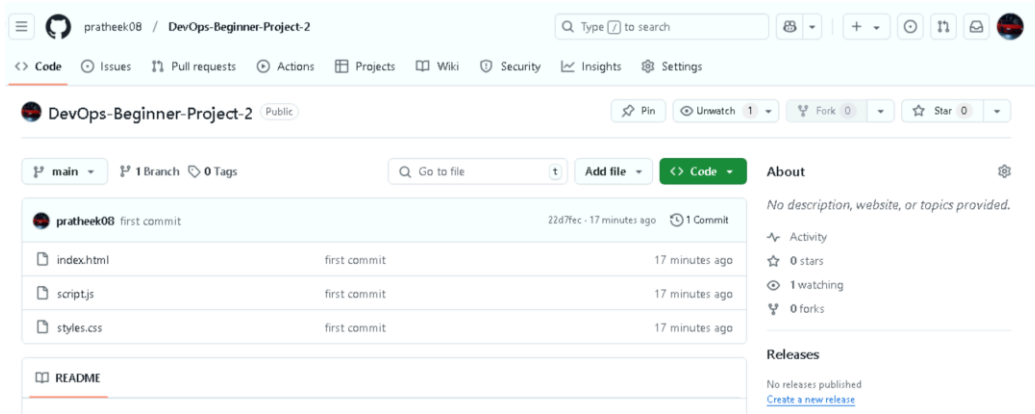

```
index.html JS script.js # styles.css X
# styles.css > todo li
1 {
2   margin: 0;
3   padding: 0;
4   box-sizing: border-box;
5 }
6
7 body {
8   background-color: rgb(18, 19, 19);
9   color: white;
10  font-family: "Poppins", sans-serif;
11  min-height: 100vh;
12 }
13
14 header {
15   font-size: 1.5rem;
16 }
17
18 header,
19 form {
20   min-height: 20vh;
21   display: flex;
22   justify-content: center;
23   align-items: center;
24 }
25
26 form input,
27 form button {
28   padding: 0.5rem;
29   padding-left: 1rem;
30   font-size: 1.5rem;
31   border: none;
32   background: white;
33   border-radius: 2rem;
34 }
35
36 form button {
37   color: rgb(0, 255, 255);
38   background: white;
39   cursor: pointer;
40   transition: all 0.3 ease;
41   margin-left: 0.5rem;
42 }
43
```

- JS

```
index.html JS script.js X # styles.css
JS script.js >
1 const todoInput = document.querySelector(".todo-input");
2 const todoButton = document.querySelector(".todo-button");
3 const todoList = document.querySelector(".todo-list");
4 const filterOption = document.querySelector(".filter-todo");
5
6 document.addEventListener("DOMContentLoaded", getLocalTodos);
7 todoButton.addEventListener("click", addToDo);
8 todoList.addEventListener("click", deleteCheck);
9 filterOption.addEventListener("change", filterToDo);
10
11 function addToDo(event) {
12   event.preventDefault();
13   const todoDiv = document.createElement("div");
14   todoDiv.classList.add("todo");
15   const newTodo = document.createElement("li");
16   newTodo.innerText = todoInput.value;
17   newTodo.classList.add("todo-item");
18   todoDiv.appendChild(newTodo);
19   //ADDING TO LOCAL STORAGE
20   saveLocalTodos(todoInput.value);
21
22   const completedButton = document.createElement("button");
23   completedButton.innerHTML = '<i class="fas fa-check-circle"></i>';
24   completedButton.classList.add("complete-btn");
25   todoDiv.appendChild(completedButton);
26
27   const trashButton = document.createElement("button");
28   trashButton.innerHTML = '<i class="fas fa-trash"></i>';
29   trashButton.classList.add("trash-btn");
30   todoDiv.appendChild(trashButton);
31
32   todoList.appendChild(todoDiv);
33   todoInput.value = "";
34 }
35
36 function deleteCheck(e) {
37   const item = e.target;
38
39   if(item.classList[0] === "trash-btn") {
40     const todo = item.parentElement;
41     todo.classList.add("slide");
42
43     removeLocalTodos(todo);
44     todo.addEventListener("transitionend", function() {

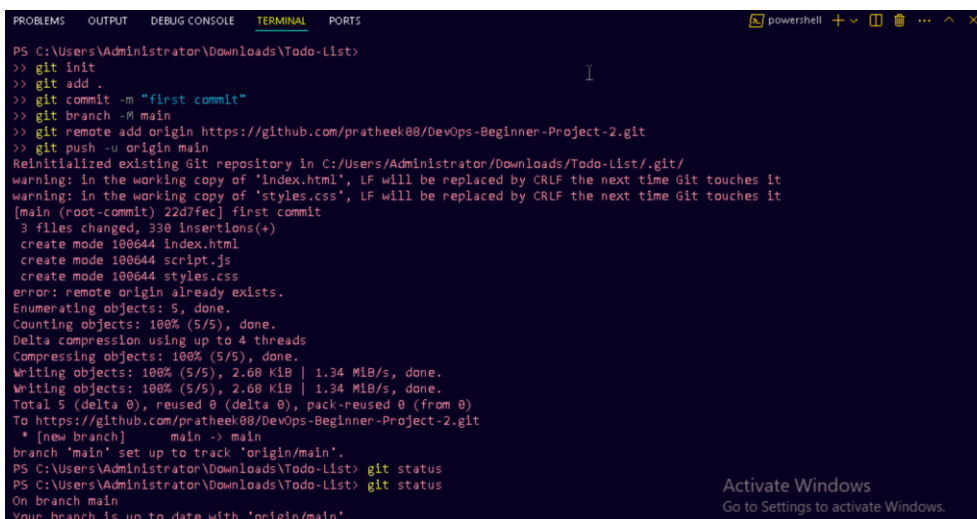

```

## Step 2 – Github Repo

### Step 3 - Commit these changes to git

```
PS C:\Users\Administrator\Downloads\Todo-List>
>> git init
>> git add .
>> git commit -m "first commit"
>> git branch -M main
>> git remote add origin https://github.com/pratheeek08/DevOps-Beginner-Project-2.git
>> git push -u origin main
```

### Step 4 - Creating branches

```
PS C:\Users\Administrator\Downloads\Todo-List> git branch html
PS C:\Users\Administrator\Downloads\Todo-List> git branch css
PS C:\Users\Administrator\Downloads\Todo-List> git brachn

The most similar command is
branch
PS C:\Users\Administrator\Downloads\Todo-List> git branch
html
js
* main
```

Step 5 - Create a new file **index.html** to add task functionality and add new branch naming **html**. Commit the changes and merge it.

```
PS C:\Users\Administrator\Downloads\Todo-List> git checkout html
M       script.js
M       styles.css
Switched to branch 'html'
PS C:\Users\Administrator\Downloads\Todo-List> git add index.html
warning: in the working copy of 'index.html', LF will be replaced by CRLF the next time Git touches it
PS C:\Users\Administrator\Downloads\Todo-List> git commit -m "branch change for html file"
[html f70f984] branch change for html file
1 file changed, 2 insertions(+), 1 deletion(-)
PS C:\Users\Administrator\Downloads\Todo-List> git branch main
fatal: a branch named 'main' already exists
M       script.js
M       styles.css
Switched to branch 'main'
PS C:\Users\Administrator\Downloads\Todo-List> git merge html
Fast-forward
 index.html | 3 ++-
